## Tech Stack

### Languages

Ruby, Python, JavaScript, HTML5, CSS3

### Frameworks & Libraries

Ruby on Rails, React.js, Bootstrap,  
TailwindCSS

### Databases & Tools

PostgreSQL, APIs, Node, NPM, Git, GitHub,  
VSCode, Jira, Figma, Trello

## Skills

- Test Driven Development
- Object-Oriented Programming
- MVC Architecture
- Debugging
- REST API
- Web Development
- Mobile Responsiveness
- Pair Programming
- Agile
- Scrum

# Jonathan Mendler

## Full Stack Software Developer

## Summary

Innovative Full Stack Software Developer dedicated to continuous growth and learning. I stay abreast of the latest advancements in my current tech stack while actively expanding my knowledge of frameworks and languages. I am currently amplifying my skill set by focusing on containerization via courses in Docker and Kubernetes. Leveraging my background in content creation, I am able to prioritize time-sensitive output delivery without compromising project specifications. I pride myself on exemplary communication and collaboration within diverse communities. I am excited for the opportunity to contribute my existing skillset to dynamic teams while continuing to refine my technical abilities.

## Experience

### Unfinite | Full Stack Developer (Volunteer Contract)

October 2023-Present

Providence, RI (Remote)

- Crafted and implemented front-end development strategies, leading to a 10% enhancement in website performance through the application of optimization techniques like code minification and troubleshooting utilizing browser developer tools
- Implementation of mobile responsiveness in React, creating access to 58% more web traffic
- Collaboration with Founders, UX Designers, and Marketing Team translating Figma designs into HTML, CSS, and JavaScript streamlining design and functionality of product

### Digital Content Creator | Twitch.tv/Youtube/Instagram/TikTok

March 2021 - Present

Chicago, IL

- Launched innovative video content, monetizing within one month of launch and currently ranking in the top 5% of global Twitch streamers weekly for over 2 years
- Tested alpha and beta versions of independently created multiplayer video games, communicating detailed feedback to lead developers on how to replicate bugs reducing time to release by 10%
- Planned, produced, and orchestrated the release of short-form video content for multiple social media channels by leveraging Adobe Creative Cloud increasing discoverability by 44%
- Utilized platform analytics to determine trends and develop future content aligned with user needs

### Independent Contractor | Voice Actor

February 2017 - Present

Chicago, IL

- Consistently maintained a 95% accuracy rate in quality control of all final recordings before transitioning to production
- Proofread scripts displaying a conscientious approach to detail to minimize errors, reducing reproduction time by 10%
- Fostered relations with directors, actors, and writers to create a cohesive experience for audiobook listeners

### Focal Point Lights | CAD Operator

August 2014 - August 2016

Chicago, IL

- Analyzed specifications, engineering drawings, ideas, and related design data to determine critical factors affecting design of custom lighting fixtures
- Interdepartmental collaboration with Project Managers, Design Engineers, and Manufacturing Floor to ensure all requirements for customer specifications were properly incorporated
- Created, modified, and managed AutoCAD files for manufacturing, increasing efficiency by 15%

## Coding Projects

### Stream-A-Go - A gaming review app focused on live streaming potential

- Backend RESTful API using MVC architecture built with Ruby on Rails. [Backend Repo](#)
- Frontend single page application built with npm, webpack, React.js, Bootstrap. [Frontend Repo](#)
- Object-relational database management utilizing PostgreSQL and Postico
- Secure authenticated user profiles utilizing JSON web tokens.
- OAuth2.0 web token verification via Twitch API required for contributions.

### CoCa - Website Repo + Page

- Frontend single page application built with HTML, CSS, React.js, and Bootstrap provides an intuitively designed website layout utilizing parallax scrolling effect.
